TABLE OF CONTENTS:

LIST OF FIGURES: iii
LIST OF TABLES: iii
LIST OF PICTURES: iv
ABBREVIATIONS AND ACRONYMS v
Chapter 1 Introduction 1
1.1 Case of Study: Intensive-Protected Agriculture Farms in the Arava Desert, Israel. 2
Chapter 2 Literature Background 4
2.1 Introducing Intensive and Protected Agriculture 4
2.2 Types of Protected Agriculture 5
2.2.1 Greenhouses 5
2.2.2 Net-houses: 6
2.2.3 High Tunnels: 7
2.2.4 Low tunnels: 7
2.2.5 Mulches 7
2.3 Advantages and Disadvantages of Intensive Agriculture 8
2.3.1 Economical advantages and disadvantages: 8
2.3.2 Environmental advantages and disadvantages: 8
Chapter 3 Introducing Biodiversity and Actual Situation 12
3.1 Biodiversity importance 12
3.2 Biodiversity loss 13
3.3 Biodiversity in Desert Environments 14
3.4 Protected-Intensive Agriculture in Deserts 15
Chapter 4 Methods 19
4.1 Production System Analysis: Conceptual Framework 19
4.2 Data collection 20
4.3 Analysis of the impacts 21
4.4 Designing Biodiversity Supportive Guidelines 21
4.5 Calculation of implementation costs of the designed guidelines: 22
Chapter 5 Description of the Central Arava Region, Israel 23
5.1 Location 23
5.2 Climate conditions 24

5.3 Water Sources Location and Uses 25
5.4 Land 26
5.5 Nature Reserves in Arava 27
5.6 Arava Biodiversity 28
5.7 Arava Agricultural Products 32
5.8 Greenhouses in the Arava: Evolution on the area 34
5.9 Agriculture and Economic Importance 36
Chapter 6 Analysis of Protected Agriculture Production System in the Arava 39
6.1 Overview 39
6.2 Net house, Greenhouse and High Tunnels Structures' Design 39
6.2.1 Design, building materials and dimensions 39
6.3 Structures Spatial Planning: 47
6.4 Use and Distribution of water 48
6.5 Inputs, outputs and management: 49
6.5.1 Fertilizers 49
6.5.2 Pesticides and Herbicides 51
6.5.3 Substrates and Use of Land 53
6.6 Residual Management 55
6.6.1 Inorganic Residues 55
6.6.2 Organic Residues 58
6.6.3 Chemicals' Containers 60
6.7 Impacts of Production System on biodiversity 61
6.7.1 Structures' Design: 61
6.7.2 Structures' Spatial Design: 61
6.7.3 Water use 62
6.7.4 Fertilizers 62
6.7.5 Pesticides and Herbicides: 62
6.7.6 Substrates- Use of land: 63
6.7.7 Organic Residues 63
6.7.8 Inorganic Residues: 63
6.7.9 Chemical Containers: 64
Chapter 7 Guidelines for the Design of Biodiversity-Supportive Greenhouses 65

Chapter 8 Conclusions and Further Studies....73
References: 76
Appendix....85

LIST OF FIGURES:

Figure 1 National Reserve Map of Israel....3
Figure 2 Map of Central Arava Council....24
Figure 3 Nature Reserves surrounding Agricultural Villages in the Arava....28
Figure 4 Distribution of Total Crops produced in the Arava in percentages, 2007/08 33
Figure 5 Flat Net-House Design....41
Figure 6 Double Slope Net-House Design 42
Figure 7 Gothic (Saphire) Design....43
Figure 8 " Meron" Design....44
Figure 9 High Tunnel Arc 3" Design....46

LIST OF TABLES:

Table 1List of Interviewed Experts and Area of Interest, 2008 21
Table 2 Total Cultivated Area by Crops, 2007/08....33
Table 3 Total Organic and Conventional Production in the Arava, 2007/08 34
Table 4 Distribution of Vegetable Area by Growing Methods, 2007/08 36
Table 5 Production Parameter Impacts on Biodiversity, 2008 64

LIST OF PICTURES:

Picture 1 *Acacia tortillis* 30
Picture 2 *Acacia raddiana* 31
Picture 3 *Ochradenus baccatus* 31
Picture 4 *Uromastyx aegyptious* Picture 5 *Gazella Dorca* 32
Picture 6 Greenhouse Evolution, 2001 36
Picture 7 Flat Net-House in Yair Station, Hazeva, 2008 41
Picture 8 Double Slope Net-House in Yair Station, Hazeva, 2008 42
Picture 9 Gothic Greenhouse in Moshav Hazeva, 2008 44
Picture 10 Meron Type Greenhouse in Moshav Hazeva, 2008 45
Picture 11 High Tunnels in Moshav Hazeva, 2008 47
Picture 12 Open Spaces between Plots in Moshav Hazeva, 2008 48
Picture 13 Gravel Substrate in Yair Station, Moshav Hazeva, 2008 54
Picture 14 Distribution of Inorganic Residues in the Deposit, Moshav Hazeva, 2008 57
Picture 15 Plastic in Inorganic Deposit, Moshav En Yahav, 2008 57
Picture 16 Irrigation Pipes and Nets in Inorganic Deposit, Moshav En Yahav, 2008 58
Picture 17 Organic Residues Deposit in Moshavimg Hazeva and En Yahav, 2008 59
Picture 18 Boxes designated for drinking bottles and containers, 2008 60

ABBREVIATIONS AND ACRONYMS

ATTRA:	National Sustainable Agriculture Information Service
CAF:	Central Arava Fund
CBD:	Convention Biological Diversity
DAEDALUS:	Data, Decision and Language, S.A.
EPA:	Environmental Protection Agency
GIS:	Geographic Information Systems
IAEA:	International Atomic Energy Center
INRA:	French National Institute for Agricultural Research
IPM:	Integrated Pest Management
ISO:	International Organization for Standardization
MA:	Millennium Ecosystem Assessment
MEP:	Israel Ministry of Environmental Protection
MFA:	Israel Ministry of Foreign Affairs
MOAG:	Israel Ministry of Agriculture
NPA:	Israel Nature and Parks Authority
Pers. comm.:	Personal Communication
