Abstract

Resumen

CHAPTER 1. General Introduction	01
CHAPTER 2. Vegetation Indexes	13
Evaluation of the METRIC model to estimate NDVI, SAVI and LAI for a drip-irrigated Merlot vineyard	14
Abstract	14
Introduction	15
Theory	17
Materials and Methods	18
Results and Discussion	21
Conclusions	23
References	23
List of Figures	26
List of Tables	27
CHAPTER 3. Surface Energy Balance	32
Ground-truthing of METRIC satellite albedo and surface energy balance over a vineyard	33
Abstract	33
Introduction	34
Theoretical basis	36
Materials and Methods	39
Results and Discussion	45
Conclusions	51
References	52
List of Figures	56
List of Tables	61
Appendix. Nomenclature	65
CHAPTER 4. Crop coefficients and actual evapotranspiration	67
Crop coefficients and actual evapotranspiration for a drip-irrigated Merlot vineyard using multispectral satellite images	68
Abstract	69
Introduction	69
Theory	72
Materials and Methods	74
Results and Discussion	79
Conclusions	83
References	84
List of Figures	87
List of Tables	97
Appendix A. Nomenclature	100
CHAPTER 5. Conclusions and Recommendations	103
